BIBLIOGRAPHIA INVERTEBRATORUM AQUATICORUM CANADENSIUM (BIBLIOGRAPHIA) is published as a series of volumes of selected information from the computerized Bibliography of Canadian Aquatic Invertebrates maintained by the National Museum of Natural Sciences, National Museums of Canada. It encompasses three general areas: an index of generic names (*Index Generum*); a list of the references used in BIBLIOGRAPHIA (*Index Bibliographicus*); and a compilation of published information on species, by taxonomic group (*Synopsis Speciorum*).

Volumes are published at irregular intervals. English and French texts appear in each volume. A list of titles and copies of individual volume are available by mail from the National Museum of Natural Sciences, Ottawa, Canada. K1A 0M8

BIBLIOGRAPHIA INVERTEBRATORUM AQUATICORUM CANADENSIUM (BIBLIOGRAPHIA) est une collection de volumes qui contiennent des renseignements choisis provenant de la Bibliographie informatisée des invertébrés aquatiques du Canada, tenue par le Musée national des sciences naturelles, Musées nationaux du Canada. Cette bibliographie comprend trois éléments principaux: une liste générique (*Index Generum*); une liste de références utilisées dans BIBLIOGRAPHIA (*Index Bibliographicus*); et une compilation des informations publiées sur les espèces, par groupe taxinomique (*Synopsis Speciorum*).

Ces volumes ne sont pas publiés régulièrement. Les textes paraissent en français et en anglais dans chaque volume. Pour obtenir la liste des titres de la collection et des exemplaires de certains volumes, prière d'écrire au Musée national des sciences naturelles, Ottawa, Canada K1A 0M8.

PREFACE

Publications on aquatic invertebrates of Canada first appeared in the second decade of the nineteenth century. During the early days, taxonomic studies dominated the literature, and many of these were published as part of the scientific results of expeditions or in monographs of taxonomic groups. With the advance of science, the scope of invertebrate studies has expanded to cover a large number of different fields, such as ecology, fisheries, physiology, biochemistry and genetics. Consequently, results of these studies have been published in hundreds of different kinds of scientific journals and reports, some of which are obscure and difficult to obtain. It has thus become tremendously difficult to assemble available published information on the aquatic invertebrate fauna of our country. In the past, bibliographers attempted to compile information on these animals but most of them limited their scope to a taxonomic group, an ecological unit, or a special topic.

The Bibliography of Canadian Aquatic Invertebrates, *Bibliographia Invertebratorum Aquaticorum Canadensium,* was started in 1973, and in 1975 became a special project of the Canadian Oceanographic Identification Centre; since 1979 it has been carried on by the Invertebrate Zoology Division of the National Museum of Natural Sciences. The purpose of this project is to document as many as possible of the scientific names applied to Canadian marine and freshwater invertebrates, to establish a list of currently recognized species, and to compile relevant published data, such as records of distribution and categories of studies for each species. All Recent free living and ectoparasitic species are included but all insects, protozoans, and endoparasites are excluded.

Bibliographia deals with all marine and freshwater environments in Canada. However, in order to present a complete synopsis of the aquatic invertebrate fauna of northern North America, Alaska, Puget Sound, Lake Champlain and the whole of the Great Lakes, except Lake Michigan, are included.

In the freshwater environment, all permanent and temporary inland water bodies are considered. Thirteen regions are recognized based on political boundaries, namely: British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland, Alaska (including the Aleutian Islands east of 170°W), Yukon Territory, and Northwest Territories.

In the marine environment we have covered localities (from about 48°W to 170°W) within the 200-metre bathymetric contour but including deeper waters of embayments and passages between islands. Three regions are recognized: Pacific, Arctic, and Atlantic. The Pacific

PRÉFACE

Les premières publications sur les invertébrés aquatiques du Canada ont paru au cours de la deuxième décennie du XIX^{e} siècle. Au début, la littérature sur cette question était dominée par les études taxinomiques, dont beaucoup étaient publiées sous forme de tranches des résultats d'expéditions scientifiques, ou de monographies sur des groupes taxinomiques. Avec les progrès de la science, le champ des études des invertébrés s'est étendu à un grand nombre d'autres domaines, dont l'écologie, les pêcheries, la physiologie, la biochimie et la génétique. Par conséquent, les résultats de ces études ont paru dans des centaines de types différents de revues et de rapports scientifiques, dont certains sont peu connus et d'accès difficile. Il est donc devenu extrêmement difficile de rassembler toute la documentation publiée sur les invertébrés aquatiques de notre pays. Par le passé, des bibliographes se sont efforcés de réunir l'information sur ces animaux mais, dans la plupart des cas, ont limité leurs travaux à un groupe taxinomique, à une zone écologique ou à un sujet particulier.

Les travaux sur la Bibliographie des invertébrés aquatiques du Canada, *Bibliographia Invertebratorum Aquaticorum Canadensium,* ont commencé en 1973; en 1975, ils devenaient un projet spécial du Centre canadien d'identification océanographique et, en 1979, c'est la Division de la zoologie des invertébrés, au Musée national des sciences naturelles, qui s'en chargeait. Ce projet a pour but de recueillir le plus grand nombre possible de noms scientifiques qui désignent les invertébrés d'eau salée ou d'eau douce du Canada, de dresser la liste des espèces actuellement reconnues et de réunir les données publiées pertinentes, notamment celles concernant la répartition et les études relatives à chacune de ces espèces. Le projet embrasse toutes les espèces d'invertébrés indépendants et ectoparasites du Quaternaire récent, mais ne comprend pas les insectes, les protozoaires et les endoparasites.

La *Bibliographia* porte sur tous les milieux d'eau salée et d'eau douce du Canada. Toutefois, afin que la synopsis englobe la faune des invertébrés aquatiques de toute l'Amérique du Nord septentrionale, notre étude embrasse également l'Alaska, Puget Sound, le lac Champlain, et les Grands Lacs, sauf le lac Michigan.

Dans les eaux douces, toutes les masses d'eau permanentes et temporaires de l'intérieur sont comprises. Le territoire étudié est subdivisé en treize régions correspondant au découpage politique: Colombie-Britannique, Alberta, Saskatchewan, Manitoba, Ontario, Québec, Nouveau-Brunswick, Nouvelle-Écosse, Île-du-Prince-Édouard, Terre-Neuve, Alaska (y compris les Aléoutiennes à l'est de 170° 0), territoire du Yukon et territoires du Nord-Ouest.

En ce qui concerne les eaux salées, notre travail englobe tous les endroits situés à l'intérieur de la courbe bathymétrique de 200 m (entre approximativement 48° et 170° 0), mais aussi les eaux profondes des enfoncements du littoral et des passages entre les îles. Le territoire étudié

Region covers the coastal waters from Cape Flattery, Washington to the Aleutian Islands, Alaska, including Juan de Fuca Strait, Puget Sound, and the Gulf of Alaska. The Arctic Region, from the Aleutian Islands to Cape Chidley, Labrador, includes the east Bering Sea, the Chukchi and southern Beaufort Seas, and the coastal waters around and passages between the Canadian arctic islands. The Atlantic Region, from Cape Chidley to Brown Bank and the mouth of the Bay of Fundy, includes the Gulf of St. Lawrence and the Laurentian Channel.

Conventional tools, such as *Zoological Record* and *Biological Abstracts,* were used to search the literature. Complete runs of more than forty scientific journals which have been the primary sources for publications on aquatic invertebrates in general and Canadian species in particular were scanned, including: all publications in zoology by the National Museums of Canada and the United States National Museum; all publications by the Fisheries Research Board of Canada, *Canadian Journal of Zoology* and *The Canadian Field-Naturalist,* in all their different incarnations; and *Le Naturaliste canadien.* Subsequently, references cited in the publications reviewed were checked. We have striven to search all literature up to and including 1976 but realize that no endeavour of this sort could ever be complete*. In all we have reviewed works published in more than 700 different scientific journals and expedition reports and in numerous books, and abstracted relevant information from about 5,000 articles. This information is stored in the computer system of the Canadian Heritage Information Network of the National Museums of Canada.

With the computer facilities, three kinds of publications will be produced: a generic list, *Index Generum,* a reference list, *Index Bibliographicus,* and a series of species synopses of the taxonomic groups, *Synopsis Speciorum.* The inventory contains more than 17,000 species names in about 4,700 genera, from almost all phyla of the Animal Kingdom. Obviously, we will need the help of specialists to clarify the validity of some of these names, and invite scholars to author publications in the *Synopsis Speciorum* series, based on our computerized data.

This bibliography programme would not have been accomplished without the collective efforts of many people. In 1973, Diana Laubitz started to compile a bibliography of Canadian marine benthic invertebrates. This project was expanded to its present form in 1975 by Chang-tai Shih, Diana Laubitz, and Ian Sutherland. Nishi Sharma (1975-1980) and Penelope Adams (summers of 1975-1978) contracted to

*For recent publications, computerized retrieval systems are available, through, for instance, Canada Institute for Scientific and Technical Information (CISTI) of the National Research Council of Canada.

est subdivisé en trois régions correspondant aux trois océans; Pacifique, Arctique et Atlantique. La région du Pacifique englobe les eaux côtières depuis du cap Flattery (État de Washington) aux Aléoutiennes (Alaska), y compris le détroit de Juan de Fuca, Puget Sound, et le golfe d'Alaska. La région de l'Arctique s'étend des Aléoutiennes au cap Chidley (Labrador), y compris la partie orientale de la mer de Béring et de la mer des Tchouktches, et la partie méridionale de la mer de Beaufort, ainsi que les eaux côtières entourant les îles de l'Arctique canadien et les passages entre celles-ci. La région de l'Atlantique s'étend du cap Chidley (Labrador) jusqu'au banc de Brown et à l'embouchure de la baie de Fundy, y compris le golfe du Saint-Laurent et le chenal Laurentien.

Pour orienter nos recherches, nous avons consulté des volumes de références, comme le *Zoological Record* et les *Biological Abstracts.* De plus, nous avons dépouillé la collection complète de plus de quarante revues scientifiques, qui ont constitué les principales sources de publications sur les invertébrés aquatiques en général et au Canada en particulier, notamment: toutes les publications sur la zoologie des Musées nationaux du Canada et de l' "United States National Museum"; toutes les publications du Conseil de recherches sur les pêcheries du Canada, le *Journal canadien de zoologie* et le *Canadian Field-Naturalist* dans tous leurs avatars, et *Le Naturaliste canadien.* Il s'agissait ensuite de retracer les références indiquées dans les publications dépouillées. Nous avons essayé d'examiner toute la documentation publiée jusqu'en 1976 inclusivement, mais nous nous rendons compte qu'aucune tentative de ce genre ne sera jamais entièrement couronnée de succès*. En tout, le dépouillement à porté sur les travaux publiés dans plus de 700 revues scientifiques et rapports d'expéditions et dans de nombreux ouvrages, et quelque 5 000 articles ont fourni des données pertinentes. Ces informations sont stockées dans la banque du Réseau canadien d'information sur le patrimoine, aux Musées nationaux du Canada.

Nous servant des ressources de l'informatique, nous produirons trois types de publications: une liste générique, *Index Generum;* une liste de références, *Index Bibliographicus;* et une série de synopsis des noms spécifiques des groupes taxinomiques, *Synopsis Speciorum.* Nos données renferment le nom de plus de 17 000 espèces appartenant à quelque 4 700 genres ressortissant à presque tous les embranchements du règne animal. Évidemment, il nous faudra obtenir l'aide de spécialistes pour contrôler la validité de certains de ces noms. Des chercheurs seront invités à écrire des textes pour la série des *Synopsis Speciorum,* et ils auront accès à cette fin aux données informatisées.

Cette bibliographie n'existerait pas sans les efforts concertés d'un grand nombre de personnes. En 1973, Diana Laubitz a commencé à établir une bibliographie des invertébrés benthiques du Canada. En 1975, Chang-tai Shih, Diana Laubitz et Ian Sutherland étendirent la portée de ce projet et lui donnèrent sa forme actuelle. Nishi Sharma (1975-1980) et Penelope Adams (étés 1975-1978) s'engagèrent par contrat à dépouiller et à passer

*Pour retracer les publications récentes, il existe des systèmes informatiques de recherche documentaire, comme celui de l'Institut canadien de l'information scientifique et technique (ICIST), au Conseil national de recherches du Canada.

search and review literature. Wendy Antoine, under contract, rearranged the data for computer input and operated the computer terminal.

Fahmida Rafi, Judith Fournier, Muriel Smith, Peter Frank, Rama Chengalath, Jacqueline Madill, and Jane Topping, all of the Invertebrate Zoology Division, Stephen Nash, Deanna Beckett, and Dale Johannsen, on contract, and several students, including Eva and Paul Laubitz, Lynn MacBeath, Stephen McKeen, Akshay Sharma, and Catherine Symons have contributed to our work and are duly acknowledged. The maps were prepared by Sally Gadd with the advice of Brian Cromie of the Department of Energy, Mines and Resources.

We thank Audrey Dawe and Valerie Monkhouse, respectively former and present Chief Librarian of the National Museums of Canada, and their staff for cheerfully accepting our extraordinary demands on their service; Peter Homulus, Ray Bellamy and the staff of the Canadian Heritage Information Network, for assisting us in computer programming and data processing. For their encouragement and trust during the course of our seemingly never-ending preparation of the bibliography, we would like to express our deep appreciation to Daniel Faber, formerly Chief of the Canadian Oceanographic Identification Centre; Charles Gruchy, previously Chief of the Invertebrate Zoology Division and presently Acting Director of the National Museum of Natural Sciences; and Louis Lemieux, former Director of the National Museum of Natural Sciences.

en revue des éléments de la documentation. Wendy Antoine, engagée comme contractuelle, a modifié la présentation des données à informatiser et fait fonctionner le terminal.

Fahmida Rafi, Judith Fournier, Muriel Smith, Peter Frank, Rama Chengalath, Jacqueline Madill et Jane Topping, tous de la Division de la zoologie des invertébrés, Stephen Nash, Deanna Beckett et Dale Johannsen, comme contractuels et plusieurs étudiants, notamment Eva et Paul Laubitz, Lynn MacBeath, Stephen McKeen, Akshay Sharma et Catherine Symons ont contribué à nos travaux et ils ont droit à leur part de gratitude. Sally Gadd a préparé les cartes et a été conseillée par Brian Cromie du ministère de l'Énergie, des Mines et des Ressources.

Notre reconnaissance va également à Audrey Dawe et à Valerie Monkhouse, respectivement ancienne et actuelle bibliothécaire en chef des Musées nationaux du Canada, et à leur personnel, pour avoir acceuilli avec une grande gentillesse nos demandes de services exceptionnelles, et à Peter Homulus, à Ray Bellamy et au personnel du Réseau canadien d'information sur le patrimoine, pour nous avoir aidé à programmer et à traiter les données. Enfin, pour leurs encouragements et leur confiance tout au long de notre interminable travail de préparation de la Bibliographie, nous tenons à exprimer nos profonds remerciements à Daniel Faber, autrefois chef du Centre canadien d'identification océanographique, Charles Gruchy, anciennement chef de la Division de la zoologie des invertébrés et présentement directeur intérimaire du Musée national des sciences naturelles, et à Louis Lemieux, ancien directeur du Musée national des sciences naturelles.

INTRODUCTION

Canada has a long and complex shoreline bordering three oceans, and a large variety of inland lakes and rivers. Its climate varies from temperate to arctic. The aquatic fauna encompasses almost all the phyla of the animal kingdom and several thousand genera. It is represented in many habitats, ranging from the open water and bottom sediments of large lakes and oceans to the littoral regions of intermittent ponds, and moist boggy areas. In the face of such taxonomic and ecological diversity it is impossible for any one person to become familiar with all the names and types of animals reported from the country.

This list of generic names has been compiled in the course of searching the literature for the *Bibliographia Invertebratorum Aquaticorum Canadensium*. It contains all the generic names that we have found applied to the aquatic invertebrates of northern North America, excluding Protozoa, Insecta, and endoparasites.

The main source of the generic names has been the primary literature. Since it is practically impossible to gather all the names applied in this manner, we have also searched Whiteaves (1901), Shih *et al.* (1971) and Kozloff (1974). We recognize, however, that a list of this nature will inevitably omit some names and contain other errors, and we appeal to users to inform us of these.

This work is divided into two sections: the first lists alphabetically all generic names that we have found applied to aquatic invertebrates of the area and notes the major taxon (usually phylum) and usually one or two minor taxa (class, order, etc.) to which they belong. The second section lists genera alphabetically within the respective minor taxa, which are in turn listed alphabetically within major taxa. Mis-spellings, typographical errors, etc, are also listed with cross-reference to the correct spelling of the name. It must be emphasized that we have made no attempt to refer synonyms to their current names, nor have we passed judgement on the accuracy of any identification. If a name has been applied to specimens from the region, we have recorded it as published. Synonymies may be found in the *Synopsis Speciorum* series of *Bibliographia*.

We thank R. Chengalath, J. Fournier, P. Frank, C. Gruchy, J. Madill, F. Rafi, M. Smith, and J. Topping, all of Invertebrate Zoology Division, for their unflagging help and cheerfulness when asked to check a seemingly endless list of obsolete and extraterritorial names. All remaining errors are, of course, our responsibility.

INTRODUCTION

Le Canada possède un littoral long et complexe baigné par trois océans et une grande diversité de lacs et de cours d'eau intérieurs. Son climat varie du tempéré à l'arctique. La faune aquatique comprend presque tous les embranchements du règne animal et plusieurs milliers de genres. Elle se rencontre dans de nombreux habitats: eaux libres, sédiments des océans et des grands lacs, zones littorales des étangs périodiques, et terres marécageuses. Face à une telle diversité taxinomique et écologique, une seule et même personne ne peut se familiariser avec tous les noms et espèces animales du Canada.

La présente liste de noms génériques a été dressée au cours du dépouillement de la documentation servant à établir la *Bibliographia Invertebratorum Aquaticorum Canadensium*. Elle rassemble tous les noms génériques dont nous avons constaté l'emploi pour désigner des invertébrés aquatiques de L'Amérique du Nord septentrionale, sauf les protozoaires, les insectes et les endoparasites.

Les sources originales ont fourni la plupart des noms génériques de la liste. Cependant, comme il n'y a pratiquement pas moyen de les consulter toutes, nous avons aussi passé en revue Whiteaves (1901), Shih *et al.* (1971) et Kozloff (1974). Nous reconnaissons toutefois qu'une liste ainsi établie ne peut manquer de comporter des omissions de noms et d'autres erreurs. Les usagers sont priés de nous les signaler.

L'ouvrage a deux sections: d'abord une liste alphabétique de tous les noms génériques dont nous avons constaté l'utilisation pour désigner des invertébrés aquatiques de la région, accompagnés du taxon principal (généralement l'embranchement) et d'un ou deux des taxons secondaires (classe, ordre, etc.) auxquels ils ressortissent; ensuite une liste alphabétique des noms génériques sous les taxons mineurs respectifs, eux-mêmes donnés par ordre alphabétique sous les taxons principaux. Les noms déformés par des orthographes erronées, des coquilles, etc. sont également indiqués avec des renvois à la graphie normale. Il faut noter que les synonymes ne font pas l'objet de renvois aux noms modernes usuels, et que nous ne nous sommes pas prononcés sur la justesse des identifications. Tout nom appliqué à des spécimens d'une région donnée est automatiquement reçu tel que publié. Les synonymies figurent dans la partie de la *Bibliographia* consacrée au *Synopsis Speciorum*.

Nous tenons à remercier R. Chengalath, J. Fournier, P. Frank, C. Gruchy, J. Madill, F. Rafi, M. Smith et J. Topping, tous de la Division de la zoologie des invertébrés, pour avoir vérifié avec un zèle et un entrain inépuisables une liste quasiment interminable de noms désuets et extraterritoriaux. S'il reste des erreurs, nous en assumons évidemment l'entière responsabilité.

CASTRADA	Platyhelminthes	Turbellaria
CATABLEMA	Cnidaria	Hydrozoa
CATHERINA see **KATHARINA**		
CATHYPHA see **CATHYPNA**		
CATHYPNA	Rotifera	

CATRIONA	Mollusca	Gastropoda
CAUDINA	Echinodermata	Holothuroidea
CAULIBUGULA	Bryozoa	Gymnolaemata
CAULLERIELLA	Annelida	Polychaeta
CAULORAMPHUS	Bryozoa	Gymnolaemata
CAVOLINA see CAVOLINIA		
CAVOLINIA	Mollusca	Gastropoda
CECROPS	Crustacea	Copepoda-Siphonostomatoida
CELANUS see CALANUS		
CELLARIA	Bryozoa	Gymnolaemata
CELLEPORA	Bryozoa	Gymnolaemata
CELLEPORARIA	Bryozoa	Gymnolaemata
CELLEPORELLA	Bryozoa	Gymnolaemata
CELLEPORINA	Bryozoa	Gymnolaemata
CELLULARIA	Bryozoa	Gymnolaemata
CEMORIA	Mollusca	Gastropoda
CENTHIOPSIS see CERITHIOPSIS		
CENTRAUGAPTILUS	Crustacea	Copepoda-Calanoida
CENTROGAPTILUS see CENTRAUGAPTILUS		
CENTROMEDON	Crustacea	Amphipoda-Gammaridea
CENTROPAGES	Crustacea	Copepoda-Calanoida
CEPHALODELLA	Rotifera	
CEPHALOSIPHON	Rotifera	
CEPHALOTHRIX	Nemertea	
CERADOCUS	Crustacea	Amphipoda-Gammaridea
CERAMASTER	Echinodermata	Asteroidea
CERAMONEMA	Nematoda	
CERAPHILUS see CHERAPHILUS		
CERAPUS	Crustacea	Amphipoda-Gammaridea
CERASTODERMA	Mollusca	Bivalvia
CERATOCEPHALE	Annelida	Polychaeta
CERATOISIS	Cnidaria	Anthozoa
CERATOMYSIS	Crustacea	Mysidacea
CERATONEREIS	Annelida	Polychaeta
CERATOSTOMA	Mollusca	Gastropoda
CERATOTROCHA	Rotifera	
CERBEROTHROMBIUM	Chelicerata	Acari
CERCARIA	Platyhelminthes	Trematoda
CERCOPS	Crustacea	Amphipoda-Caprellidea
CEREBRATULUS	Nemertea	
CEREMASTER see CERAMASTER		
CERIANTHEOPSIS	Cnidaria	Anthozoa
CERIANTHUS	Cnidaria	Anthozoa
CERIODAPHNIA	Crustacea	Cladocera
CERITHIDEA	Mollusca	Gastropoda
CERITHIELLA	Mollusca	Gastropoda
CERITHIOPSIS	Mollusca	Gastropoda
CERITHIUM	Mollusca	Gastropoda
CERITHRITHIOPSIS see CERITHIOPSIS		
CERNOSVITOVIELLA	Annelida	Oligochaeta
CEROMYA see CERONIA		
CERONIA	Mollusca	Bivalvia
CEROSTOMA see CERATOSTOMA		
CERVINIA	Crustacea	Copepoda-Harpacticoida
CETOCHILUS	Crustacea	Copepoda-Calanoida
CHACEIA	Mollusca	Bivalvia
CHAETODERMA	Mollusca	Aplacophora
CHAETOGAMMARUS	Crustacea	Amphipoda-Gammaridea
CHAETOGASTER	Annelida	Oligochaeta
CHAETONOTUS	Gastrotricha	
CHAETONYMPHON	Pycnogonida	
CHAETOPLEURA	Mollusca	Polyplacophora
CHAETOPTERUS	Annelida	Polychaeta
CHAETOZONE	Annelida	Polychaeta
CHALINA	Porifera	Demospongiae
CHAMA	Mollusca	Bivalvia
CHAPPERIA	Bryozoa	Gymnolaemata
CHARISEA	Cnidaria	Anthozoa
CHAROPINUS	Crustacea	Copepoda-Siphonostomatoida
CHEILEA	Mollusca	Gastropoda
CHEILONEREIS	Annelida	Polychaeta
CHEILOPORA	Bryozoa	Gymnolaemata
CHELOMIDEOPSIS	Chelicerata	Acari
CHELOPHYES	Cnidaria	Hydrozoa
CHELURA	Crustacea	Amphipoda-Gammaridea
CHELYOSOMA	Tunicata	Ascidiacea
CHELYSOMA see CHELYOSOMA		
CHEMNITZIA	Mollusca	Gastropoda
CHENOPUS	Mollusca	Gastropoda
CHERAPHILUS	Crustacea	Decapoda-Caridea
CHEYLOSOMA see CHELYOSOMA

ANNOTATIONS

(1) *Actinotrocha* was cited as a binomial.
(2) *Arachnactis* was cited as a binomial.
(3) *Discopora* (Stenolaemata) is not recorded from Canada.
(4) *Discoporella* (Gymnolaemata) is not recorded from Canada.
(5) *Eurycercinae* was cited as a binomial.
(6) *Neascus* was cited as a binomial.
(7) Inversion. This was cited as *Opilio chionoectes*.

(1) *Actinotrocha* a été mentionée sous forme de binôme.
(2) *Arachnactis* a été mentionée sous forme de binôme.
(3) *Discopora* (Sténolémates) n'est pas signalée au Canada.
(4) *Discoporella* (Gymnolémates) n'est pas signalée au Canada.
(5) *Eurycercinae* a été mentionée sous forme de binôme.
(6) *Neascus* a été mentionée sous forme de binôme.
(7) Inversion. La citation donnait *Opilio chionoectes*.
